

6 REASONS YOU NEED A TECHSANTM MINI

100% TOUCH FREE

Techsan Mini is equipped with infrared patented smart-tech sensors that will detect hands from any angle, providing ease of use that is 100% touch free. This ensure that we are working hard to keep out community safe.

ECO-FRIENDLY

Our SANI-99™ starts as a powder and is packaged in a 6 gram sachet. This means less transport and no plastic waste! Simply add one sachet to 1 litre of tap water, using our refillable container, and you are ready to go.

TOUGH ON GERMS

Our disinfecting solution has been proven to eliminate 99.99995%* of bacteria, viruses and spores. SANI-99™ is absorbed by the skin to provide lasting protection against bacteria and viruses.

*From Singapore testing (contact time 5 mins)

ADAPTABLE

With its sleek and modern, wall mountable design, Techsan Mini can be easily added to any room and in any environment. With the choice to run off battery or 12V power, no added cost of trades people is required.

AFFORDABLE

Whether you're after a solution for home or office, Techsan Mini combined with SANI-99™, is the most cost-effective way to keep your loved ones safe. Storage and transport costs are minimised due to the size of the sachets and unit.

USER FRIENDLY

Our SANI-99™ solution is a water-based, alcohol-free disinfectant and sanitiser. It is suitable for all skin types and safe if ingested, as there are no harsh chemicals and is not poisonous.
